

Blocked drain, sink or toilet?

We now have our own in-house purpose built mobile drain jetting equipment

We jet drains, clear blockages, interceptors and unblock sinks, showers, waste traps, and toilets.

There is nothing worse than a blocked drain at an inconvenient time whether it be on domestic or commercial premises. We can give an approximate time when we will be calling.

Our aim is to reinstate the customers drain with the minimal amount of disruption , fuss and cost to the customer.

We operate a very portable yet powerful drain jetting unit at 3,600 psi which not only cuts through the blockages but also removes scale, and fat build up from the pipe work.

CCTV surveys can be carried out using our digital colour camera which can pinpoint accurately and problems such as collapsed drain, blockages, root intrusion etc.
